- Caitlin is a great GSI. She is really good at explaining material and how to approach problems. She does a good job emphasizing the most important material from lectures that is pertinent to the exams and is always willing to help.

- Overall, an insightful experience and had learned a great deal.
- –Great discussion teacher! – You were always very engaged, helpful, and competent, I enjoyed your classes!
- Caitlin was fine, she seems nice but I found discussion very boring. I do think it is difficult to have an interesting discussion session during a pandemic so it is not completely her fault.
- The course was difficult due to exams every other week.
- Caitlin was excellent! I attended a good number of her office hours and I always got a very thorough explanation from her on any questions I had and she did a great job of walking us through complex problems and topics. I really cannot say enough positive stuff about Caitlin, right now I'm expecting to get an A in this course and that definitely would not be the case without her.

- Ms. Hegarty was very respectful of the students in our section, was always prepared for discussion, and gave the students a better understanding of the material.
- Caitlin was a great gsi and assisted me with problems I had throughout the semester. I would recommend for her and Peter to keep their online office hours through zoom because they were very convenient
- Great instructor.
- Outstanding, probably could be a 4 credit course, if this course is taught online again, it may not do the material justice.
